Step 5: Repartner based on other information

1. There's a very big discrepancy between Manuel and Carmen, and Manuel is not good at working with students who are struggling, so I moved Marianne up to work with Manuel.
2. I moved Carmen into Marianne's place because she is reading much more fluently than Andrew, so she will provide a model for her.
3. I also moved Evan to work with Serena and Yolanda because they follow directions well and will help Evan stay on task.
4. I've left the others partnered for now, but I may have to change them based on rate of progress, behavior issues, or need for modeling.
